

Math 3315 Semester Project

Group Roles

Accountable – ensures that a particular task is completed

Responsible – actually does the task

The same Group Member can be both accountable and responsible, but not necessarily

It is up to the Group to decide which members is assigned to which role

A group members may fill more than one role, but all roles must be filled

Lead

Primary accountability is to ensure that the group stays on task, is focused, and everyone is participating in the Group's work. The Lead makes sure that the group contract is completed. The Lead ensures that all members of the Group are abiding by the group contract and is accountable for ensuring that the processes concerning group behaviors and accountabilities are followed.

Project Planner

The owner of the projects plan. Ensures that a project plan is created and is kept up to date with any changes that need to be made. The project planner ensures that everyone is aware of their tasks and keeps track of the progress toward the completion of all tasks. The project planner works with the Lead to make sure that all group members are completing their tasks on time and works with the Lead to manage any corrections that need to be made to the project plan including task assignment.

Project plans can be simply created in Excel, but you may want to explore free Project Management Software: [top-project-management-software](#)

Quality Assurance Lead

The owner of the test plan. The QA Lead ensures that a test plan is created kept up to date with test results. The QA Lead is accountable for ensuring that the project meets all the requirements agreed upon in the proposal. Specifically, items such as calculations are correct, models produce good predictions or accurate explanations, documentation and presentations are complete and error free.
